

How to Play Top Cards

Aim of the game: To win all of the cards.

How to play:

- Shuffle and deal out all the cards equally (leave any spare).
- Each player holds their cards in a pile facing towards themselves, with only the top card showing.
- Roll or decide who goes first.
- The first player reads out the name of the deity on the top card of their pile.
- Then, they pick their highest data value, for example it could be 'Powers', to challenge the other players with.
- The other players then read out the name of the deity on their top cards and the matching data value.
- The player with the highest number for that round wins and collects all the top cards played and places them with their own at the bottom of their pile.
- It is then the winners turn next.
- If two or more cards have the same highest number, then all the top cards are placed in the middle and the same player plays again using their next card. The winner of that round collects all the cards in the middle, as well as the ones from the new round.
- The game ends when one player has collected all the cards and they are the winner!

Shiva
