

Adding Fractions which have the same denominators

1. $\frac{3}{8} + \frac{4}{8} =$

6. $\frac{12}{26} + \frac{13}{26} =$

2. $\frac{4}{7} + \frac{2}{7} =$

7. $\frac{4}{18} + \frac{11}{18} =$

3. $\frac{6}{9} + \frac{3}{9} =$

8. $\frac{3}{14} + \frac{4}{14} =$

4. $\frac{2}{17} + \frac{11}{17} =$

9. $\frac{3}{12} + \frac{5}{12} =$

5. $\frac{3}{8} + \frac{3}{8} =$

10. $\frac{8}{13} + \frac{4}{13} =$

Adding fractions which have different denominators

11. $\frac{3}{6} + \frac{9}{18} =$

14. $\frac{3}{7} + \frac{8}{14} =$

12. $\frac{9}{11} + \frac{14}{22} =$

15. $\frac{8}{9} + \frac{15}{27} =$

13. $\frac{7}{16} + \frac{7}{8} =$

16. $\frac{15}{30} + \frac{27}{60} =$

Adding fractions – trickier ones

17. $\frac{2}{7} + \frac{2}{8} =$

22. $\frac{3}{7} + \frac{2}{4} =$

18. $\frac{1}{4} + \frac{3}{5} =$

23. $\frac{2}{6} + \frac{3}{5} =$

19. $\frac{2}{8} + \frac{1}{3} =$

24. $\frac{1}{6} + \frac{2}{5} =$

20. $\frac{1}{4} + \frac{3}{6} =$

25. $\frac{2}{8} + \frac{3}{5} =$

21. $\frac{3}{7} + \frac{3}{8} =$

26. $\frac{1}{3} + \frac{1}{7} =$
